WEATHER OF CONCERN

Weather of Concern

Northern California:

- Dry weather for the remainder of the week. Next system brings a chance for mountain snow showers on Sunday, 02/18/18 into Monday, 02/19/18. This will be followed by much colder temperatures on Monday and Tuesday with a possible widespread freeze.

Southern California:

- Surface high pressure, building into the Great Basin, will generate gusty Santa Ana winds across portions of Ventura and Los Angeles counties.
- The northeast winds will continue through this morning before relaxing in the afternoon.
- Peak wind gusts will range between 30 and 50 mph.
- The Santa Ana winds will result in elevated fire weather conditions across Ventura and Los Angeles Counties.

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

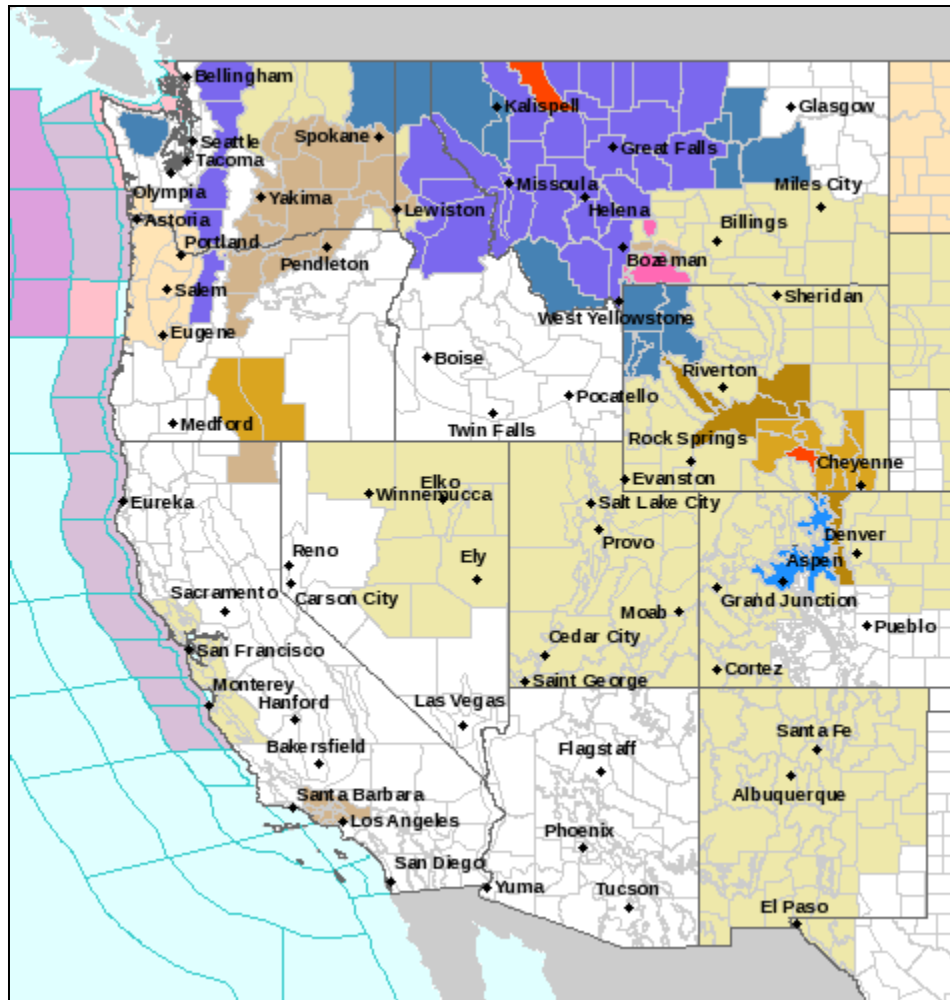

A dry cold front moved through the region the night of 02/14/18, leaving a northerly wind pattern that will continue into early Saturday. Humidity during this wind event could drop into the upper teens in the interior. There will also be a few hours this afternoon where SW-NW winds gust to 30 mph or so over the higher terrain in the far north. A cold front approaching from the north late Saturday will cause SW-NW wind gusts to increase over the higher terrain in the north to 30-40 mph. A southerly wind develop in the Sacramento Valley.

The front will move slowly through the region from north to south Saturday night and Sunday. Only far northern and eastern areas will receive light precipitation. Snow levels will start out near 4000 ft, but drop to about 2000 ft as these conditions continue into early Monday. Breezy northerly winds will return Sunday through Tuesday. Other than some higher elevation rain and snow showers late Wednesday and Thursday, cool and dry weather is expected area-wide late Monday through the end of next week. In general, the front Saturday night and Sunday will begin a period of cool unsettled weather for the next two weeks or more, with increasing amounts of moisture moving in during week two.

SOUTHERN CALIFORNIA

Temperatures will warm around 5 degrees and minimum humidity will drop into the teens both today and tomorrow as a weak ridge of high pressure builds into California from the Pacific Ocean. Winds will be light today and tomorrow. A deep trough will drop down from Canada which will bring significant cooling to the region Sunday. Temperatures will be well below normal Monday through the middle of next week. Isolated to scattered showers with light rainfall totals will be possible Sunday night through the middle of next week. Strong westerly winds will surface across the mountains and deserts Sunday into early next week.
